## DEMENTIA CARE

### YOUR PATIENT | OUR FOCUS

At NMC Health, our focus is the health of our patients and their families. When patients with behavioral complications need medical care, we're here to give them the care they need to get back home or the appropriate level of care.

- **Better Care.** Patients experience the dedication of face-to-face, one-on-one psychiatric care six days a week.
- **Better Healing.** Patients engage in specialized, one-on-one and group psycho-social sessions with licensed master social workers.
- **Better Living.** Patients get back to a fuller life with therapists personally committed to their success. Family is included, supported and welcomed.
